CINCINNATI:

TUESDAY .....SEPTEMBER 6

The Mechanics' Exhibition. The halls of Pike's Opera-house were lively last night with the hum of machinery and the open-mouthed commendation of crowds of pleased people, as they sauntered from room to room of the Mechanics Exhibition. The sidewalks during the evening were lined with people seeking access to the doors, while the band of music from a gallery constructed along the front of the immense building discoursed charming music. As the handsome ladies and well-dressed matrons pass in at the main entrance, let us observe the animated glow on the countenances as they get the first glimpse of the fine-art department, and hear their commendatory expressions. What a charming group of statuary; the fountains, the shrubs and the flowers remind me of the country! The truth is, city people would save their usual expense of doctors' bills if they would make but one visit to these rooms. What would happen if they came twice, and brought their whole families, we can't say. At the welcoming entrance of the front door is a bank of green grass, with Cook's shurubbery tastefully arranged around an artificial basin of water, while naiads and nymphs have att their native graces to charm you. A newly kindled pride is awakened at once in each visitor, as he or she glances down the long aisles of industry, represented in beautiful shapes-shapes and forms adapted to all varieties of uses. The throng pass along through the range of the fine arts proper and then proceed to the basement, and there they behold the triumphs of the Machinery department. GREENWALD's highly-finished engine gives the motive power, and LANE & BODLEY's saws are put in motion, to the gratification of crowds of

observers.

While the groups are watching with interest the log-rolling and sawing, we will ascend the steps to another room and observe the productand manufactures, which claim the tribute of our pen at every step wetake, but as we cannot be arrested in the throng at this point, we will allow the visitor the full flush of excitement of seeing all the glittering finish, artistic adorn ment and ingenious adaptation, while we fall gently into an eddy, and describe briefly an humble product of the West, one of the oddest that you could anticipate should be the one first described in the Great Fair. We call your attention to a Native American article-a great monster Cannel coal lump-just like other coal lumps, only larger. It is the grand father of some twenty beautiful and useful oils and chemicals, that not one in ten thousand would have seen if it had not been for this Fair, or heard of, if not for the Penny Press. Messis. E. GRASSELLI, E. S. WAYNE, of the Cincinnati and Phoenix Coal Oil Companies, having produced the most numerous specimens, we give a list of articles all obtained by subjecting lumps of coal to heat in retorts. First, you see a miniature column of paraffine-a white wax, like spermsceti-on a basis of polished cannel coal; then a series of tall glasses filled with three or four grades of oils; from expires in 1859." the first distillation comes coal far, used for paint; then benzole, which is used in making gas at low temperatures; then lubricating oil, used for machinery; then illuminating oil, which is clear and transparent, and well-nigh odorless; this is now a popular oil for burning

In the process of distillation residuums and products of various value and character are obtained-such as agua ammonia, or ammonia water, sulph. ammonia alumnia, carbon, napthalin, ammonia slumen, oxide of iron, sulphate ammonia, sulphur and crude paraffine. While we have been examining these various specimens, shaking the contents in the glass jars, and wondering at the analytic power of our chemists, and the rich wealth hidden in our coal lumps, the crowds have jammed up in groups all around the hall, and we escape from the rooms, promising to take notes in the machinery department, and take good care not to get too close to the immense circular saws whirling away and slashing slabs off of the saw-log. We advise the anxious people to stand further back, so that all can see its excellent work. We congratulate these Cincinnati mechanics on the success of their Cincinnati institution. Look out for daily notices by the Penny Press of the Machanics' Fair. Every department is now in prime order, and the committee are active in adjusting everything for the comfort and convenience of visit-Every one goes home highly delighted, and the moral effects of the improving visit will have a lasting influence on young and old.

#### Conference Day.

Methodist preachers are all in suspense where the Bishop will appoint them to. Conference meets to day in Dayton, and important subjects will be discussed.

# LATEST BY TELEGRAPH.

REPORTED FOR THE PENNY PRESS

#### Additional by the North Briton.

FARTHER POINT, September 5 - The steamer Wester, of the Bremen and Hamburg line, has been withdrawn for repairs.

Messrs. Caused advertise the screw-steamer
Baltic, for Halifax, to sall on Saturday, the

27th ult., simultaneously with the Arabia for Halifax and Boston. It is believed that Mr. Lever's offer to charter

the Great Eastern has been rejected.

The Russian frigate Grand Admiral had ar-

rived at Portsmouth.

Several members of the English royal family are passengers on board the North Briton.
Their visit to Canada is supposed to have reference to the contemplated visit of the

Prince of Wales to the British possessions.

The East Indian loan had all been awarded at rates above 97 per cent. The Russian loan has been a partial failure. It is reported that the British Government

congratulated France on the recent political amnesty.

The impression prevails that the recent appointment of Gen. McMahon to the com-

mand at Lille is in consequence of the projected fortifications at Antworp.

Three per cent. rentes closed on the Paris
Bourse at 69f. 10c. The Paris flour market

was heavy.

The Atlantic Telegraph Company recently deputed Mr. F. C. Webb, an engineer of con-siderable experience in testing and experi-Valentia and examine the present state of the Atlantic Cable, and his report is published in the city.

the English papers. After detailing the scientific results of his experiments, he concludes as follows: I am of the opinion that a serious fault exists about two hundred and sixty-three statute miles from Valentia, measured along the cable, and that the cable between the spot and this shore is comparatively perfect. Tests from here can not now decide whether the crom here can not now decide whether the cable is mechanically severed, as all the attempts to detect the reception of the most intense currents from the opposite shore have long since proved fruitless; still, from various circumstances attendant on the decline of the insulating, there is avery reason to believe the

circumstances attendant on the decline of the insulatine, there is every reason to believe that the continuity, both of the cable and conductor, is perfect. Whether any other faults beyond the one alluded to, it is impossible to ascertain by tests from Valentia, and the fact that the signals received at Valentia were always between the continuity of the cable of the ter than those received at New Foundland proves, undoubtedly, that worse insulatine has

proves, undoubtedly, that worse insulatine has always been near Valentia.

"Therefore it seems probable that if the fault which exists on this coast, which, very likely, forms the principal cause of leaking, could be removed, the insulation would be so far improved as to render the cable again available for signaling, provided the fault, which is said by these who have tested from Newfoundland to exist near Trinity Bay, was repaired."
Gigantic frauds in connection with the ex-Gigantic frauds in connection with the extensive Carson Iron Company of Scotland were being brought to light. It is alleged that for a long series of years the managing portion of the company has been guilty of fraud on the shareholders of unprecedented

daring and extent. The Latest by Telegraph. LONDON, WEDNESDAY .- The Daily News's city article, dated last evening, says: "The funds to day were quiet. Upon the result of the biddings for the Indian Loan being made known, cousols advanced 1/2, but subsequently relapsed, and closed the same as on

The Times's city article says: "The funds ontinue to show remarkable steadiness. Money is in good supply, and transactions took place in the discount market on Tuesday at 2½ per cent. Business in the railroad market was quiet, but firm." The Forester's festival at the Crystal Palace yesterday attracted over 62 600 market. day attracted over 62,000 people, the greatest concourse evere assembled there. The builder's strike in London shows no

sign of adjustment. The chairmakers of preestershire are also on a strike, and other branches of trade give signs of discontent-

FRANCE.-It was reported that the British Government had congratulated the French Ambassador on the recent political amnesty, and that Queen Victoria addressed very warm congratulations to Napolean on the occasion.
Commands had been distributed to the

Marshals at the head of the army of Italy.

The Duke de McMahon is appointed to the command at Litte, where a large body of troops are being concentrated. Marshals Canrobert, Castellaine and Baraguay de Hilliers return to their former commands at Nancy, Lyons and Toure. Marshal Niel replaces Bosquet at Toulouse. Marshal Magnan retains his post as Commander in Chief of the army at Paris.

The Mondeur in announcing these nomina

tions says that the augmentation of these com mands is in order to form a more equal division of the military force of the Empire.

A general impression prevailed that the
Duke de McMahon's appointment to Lille was

in reply to the projected fortifications of Antwerp.

The Constitutionnel, in a semi official notice,

says: "The reduction of the French army will take place immediately after the arrival of the corps d'armes from Italy at their respective garrisons." The rumor of a duel between Marshals

Canrobert and Neil, which prevailed when the Africa sailed, proved unfounded. It was reported that Changarnier would PARIS, WEDNESDAY.—The Moniteur of this morning contains the following: "The Emperor having ordered that the army be placed from a war to a peace footing, the Minister of War has given orders that from September, twenty thousand men should return to their homes, whose term of service

The Belgium Chamber of Deputies agreed by a vote of 75 to 40.

Le Nord contends that the project will en-danger the neutrality of Belgium. ITALY.—The Modenese National Assembly on the 20th ult. unanimously decreed the for-feiture by the House of Hapsburg Lorraine of the Ducal throne. On the following day the annexation of Modena to Piedmont was unanimously decreed by a vote by ballot, and Signor Farini was confirmed Dictator. A loan of 5,000,000 livres was also voted. The Tuscan National Assembly, on the 20th ult., unani-mously voted the annexation of Tuscany to Piedmont, amid acclamations of viva il Re. A defensive league has been formed of the States of Central Italy. [Here the line east of New York was inter-

rupted and the dispatch remains incomplete.]

Additional from California and Mexico. VERA CRUZ, August 24.—United States Min-ister McLane returned to this city on the 22d instant. He presented President Buchanan's ultimatum to Juarez, demanding an immediate ratification of the treaty.

Nothing important has transpired at the enpital. General Degoliado had ordered the troops at Tampico and in the neighborhood to march to San Luis Potosi, which place will be the gen-eral rendezvous of the Liberals. He intends attacking the capital in October. All the Pacific coast is in peaceful possession

of the Liberals. General Vidaurri was organ-izing his forces at Nuevallon against the Indians and Americans. Governor Pesquiera had defeated the Indian depredators of Sonora after a severe battle.

Pusiness at Mazatlan was good. Tepio has been recaptured by the Revolutionists after considerable fighting. Marquese was conducting \$3,000,000 to San Blas from Guad alsjars, per British war-ship Calipso. The Governor of San Blas had resolved to pre-vent the shipment if the duties were not paid.

Difficulty was apprehended.
General Corena had left Mazatlan with

fifty men to join the Liberal forces in Jalisco and attack Marquese at Guadalajara. The Isthmus of Tehuantepec was quiet. BRITISH COLUMBIA.—Governor Douglass had issued his protest against General Harney's occupation of the Island of San Juan, and sent a message to the Vancouver's Island Assembly, declaring that British forces should

be landed at San Juan. There was a doubtful rumor that the British steamer Satellite had attacked the Island and killed thirty Americans.

Later from Havana. NEW ORLEANS, Sept. 5 — The steamship De Soto, with advices from Havana to the 2d inst.,

has arrived at this port. Sugars were firm, and had advanced 13-16. Exchange on New York 334(65)4.
Yesterday the De Soto signaled the United States sloop of-war Brooklyn, from Vera Cruz, and supposed bound to Pensacels with Min-

ister McLane's treaty.

From Washington.

Washington, September 5.—Colonel Fount-leroy, of the 1st dragoons, is assigned to the command of the Department of New Mexico, and will immediately proceed to relieve Brig. Gen. Garland, whose health prevents his return to the department.

The Charleston Chamber of Commerce has

unanimously resolved to memoralize Congres for the restoration of the mail service with Havana.

Railroad Matters. LOUISVILLE, Sept. 5.—The railroad bridge at Decatur is passable, and there is now no inter-ruption on the Memphis and Charleston

Health of New Orleans. NEW ORLEANS, Sept. 5.—The Board of Health report that there are no yellow fever cases in

NEW From New York.

New York, September 5.—Last Wednesday the schooner John Elliott, Capt. J. Green, cap-sized in North River, at the foot of Ninety-firstsized in North River, at the foot of Ninety-arst-atreet, and sunk in deep water. The vessel was subsequently raised and towed to the dock, where she was pumped out yesterday. In the cabin was found the body of a man who had taken passage from Haverstraw. The deceased has not been identified, but it is believed that he was a resident of Phila-delphia. The coroner was notified to hold an inquest.

Arrival of Minister McLane at Mobile. MOBILE, Sept. 5.—The United States steamer Brooklyn arrived here at noon to day. Minister McLane is a passenger. He left for Wash-

River News.

St. Louis, Sept. 5—P. M.—River has fallen about eight inches at this point in the last twenty-four hours, and still recoding. The recentrise has entirely run out, and the river is now lower than it has been before this season. All the upper streams are very low and falling.

Weather cloudy and cool. Pirrsaung, Sept. 5-P. M.-River seven-teen inches at the Glass-house, and falling. Weather clear and cool.

For Sunday night eight prisoners escaped from the Franklin County Jail, by knocking down the Jailor with a bar of iron, and thereby rendering him insensible.

MARRIED,

By Ray, W. H. Harrison, at the residence of E. W Tutile, Esq., John B. Pendery to Miss Julia B. Redding, all of Cincinnati.

Monday mon'd a September 5, by Rev. Mr. Gray,
